HERMOSSISSIMUS

(Three-fifths Natural Size)

The Orchid Cacti are good plants for the window garden, blooming freely during April, May and June. Though the flowers are very large, the plants may be kept in 4 or 5 inch pots. Almost all of them are spineless. They are not desert plants but come from the forests of Mexico and Central America where they grow perched up in the trees along with Orchids and Ferns. They like partial shade and more water than ordinary cacti. Several flowers are borne on each flat upright "leaf." Hermosissimus is one of the loveliest flowers I know.

Well rooted plants, each..... \$1.25

CACTUS LAND

Price 10 Cents

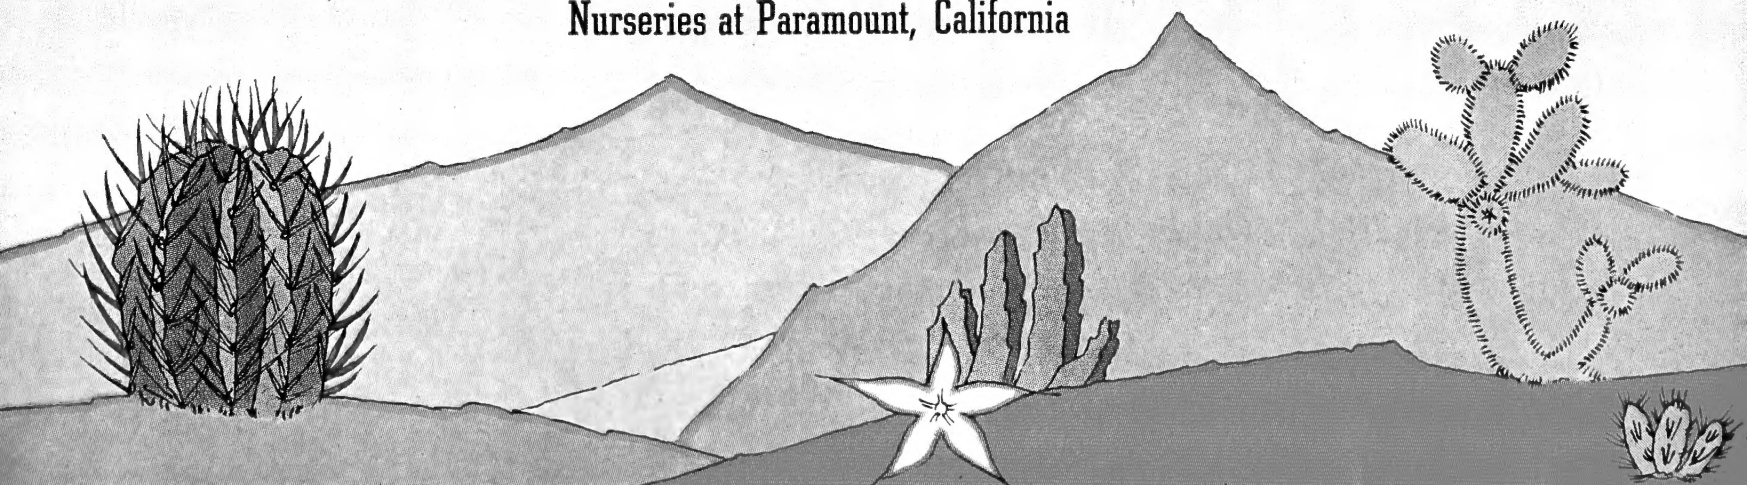

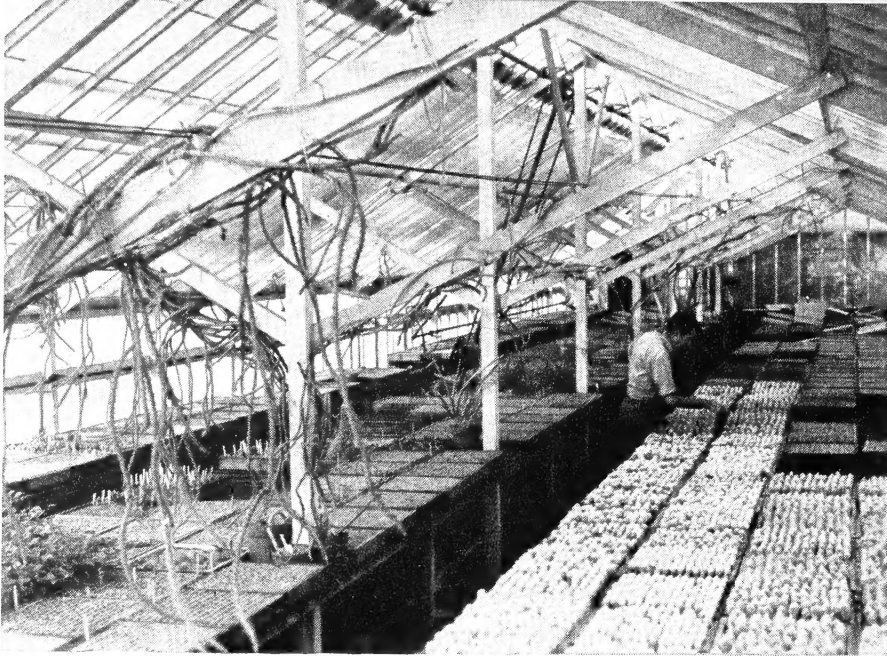

1951

OUR collection of Cacti and Succulents is one of the largest in the world both in point of species and genera, and also in number, for our stocks contain over two million plants. It is the result of over 40 years of collecting and exploration. New species are continually being received from the wilds and also from friends and fellow collectors all over the world. For further listings I refer you to our Diamond Jubilee Cactus Handbook, 48 pages of cactus lore. Price 50 cents.

JOHNSON CACTUS GARDENS

Nurseries at Paramount, California

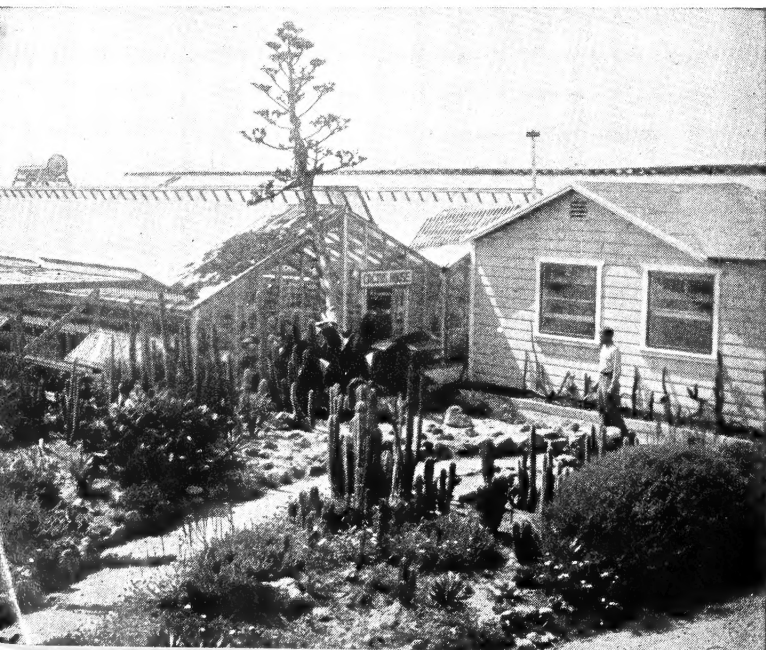

VIEW IN SEEDLING GREENHOUSE

Young cacti from the time the seed is sown until they are ready for their first "pricking off" or transplanting require far more moisture and care than at any other time during their lives. After the seed is germinated it is brought into this drier house and when ready transplanted into boxes called "flats" which you see on the benches. The plants in the foreground are Espostoas (Peruvian Old Man) and Snowball Cactus. The climbing cacti are Selenicereus and Weberocereus.

1876-1951

This year completes our 75th year as a nursery and 30 years since I first gingerly took over the reins. Our first exhibit was in the International Exposition, 1876, where we were given a Certificate of Award for a display of aquatics. Our first large catalog was published in 1881 and dealt with aquatics and greenhouse subjects. The nursery was at this time in Bordentown, N. J. In 1894 it was moved to Hollywood, California, which then consisted principally of orange and lemon groves. The old nursery, situated at the mouth of the Fern Dell in what is now Griffith Park, was a favorite rendezvous of such plant lovers as Paul de Longpre, the famous flower painter; Judge Silent and Ernest Brauntton. In 1921 we moved to Hynes, now renamed Paramount, to have more room for expansion. During the past 30 years we have continued to develop our two specialties, Water Lilies and Cacti. It would be hard to find two plant groups more antipathetic.

The fascinating thing about working with plants is that there is always more to learn. Even about the simple things that one perhaps has done a thousand times. Every year one learns how to do something better, some new angle on propagating a refractory plant, some way to get certain seeds to germinate, some way to coax a plant to bloom. If plants could be hammered out like rivets, all the fun would be gone and such satisfaction is just about the greatest dividend the plantsman can receive.

DIAMOND JUBILEE CACTUS HANDBOOK

To celebrate our 75th year we are publishing a more complete listing of rare and unusual plants. The catalog also contains more articles on culture, nomenclature, on plants in the wilds, etc. 48 pages well illustrated in color and with many photographs. Price 50c.

TERMS

I guarantee safe delivery anywhere in the United States or Canada.

FREE DELIVERY of all orders amounting to \$2 or more. Canadian minimum \$5.

BONUS. Since our break-even point is almost \$3 we gladly give a 10 per cent plant bonus on all plant orders of \$3 or more.

50 cents packing charge on all orders of less than \$2.

December shipments only by express at customer's expense except the Pacific Coast States and also Utah, Nevada, Arizona, New Mexico and Texas, where shipments by parcel post can go through.

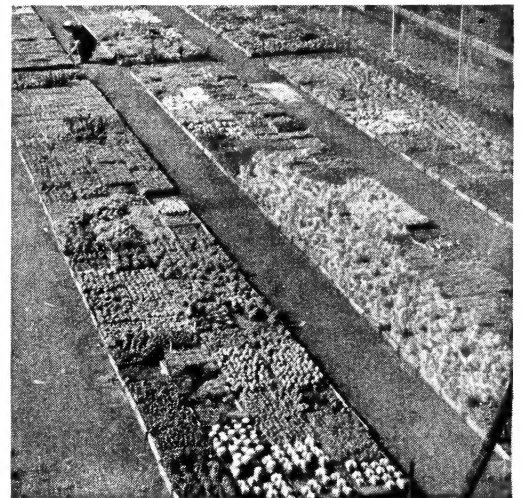

OUR GUARANTEE is for safe delivery only. We cannot undertake to make good plants lost by improper care. If for any reason plants are not received in good condition we will give credit for the damaged items if notified at once. Satisfied customers are our greatest asset.

At left: Our gardens are open to the public from 8 a.m. to 5 p.m. throughout the year. As we have some 25,000 square feet of glass, together with lathhouses and thousands of flats outside, there is considerable for the fancier to see. Also from March till October the Water Lily pools are ablaze with blossoms. The greatest number of Cacti are in bloom during the spring months when the Orchid Cacti, the Easter Lily Cacti, Echinocereus, Trichocereus, Notocactus, Parodias and the brilliant Lobivias are at their best. However, at every season the fancier will find much to interest him.

OUR CACTUS COLLECTION

We have added considerably to our collection of rare Cacti and Succulents in the past few years. Collectors in Mexico, Central and South America and in South Africa have been finding new plants or sending in new supplies of long-lost or little known species. Unfortunately, sometimes only a single specimen may be received which always poses the question of propagation which may prove very slow. One may receive plants from several sources which turn out to be different, or plants under different names which prove to be the same. The phase of botany known as taxonomy (the naming of plants) is not an exact science. There are rules which govern the precedence of names, etc., but none which more than guide a man's judgment as to what is a species or a genus. Botanists are highly individualistic and no two have ever been known to wholly agree! Thus one man may see small differences which separate plants and so describe a new species, while to another these differences do not constitute even a variety but only local forms. Just which is right is a matter of opinion. In our catalog we do not try to settle these questions, but if from the collector's or grower's standpoint there is a valid difference, we accept the most commonly known name. We do not want to confuse our patrons by continually changing names. Thus we retain genera such as Chilenia which are not valid but which constitute from the collector's standpoint an entity of similar plants different in habit from the rest of the Neoporterias. This is of course arbitrary and does not at all coincide with my own personal views. When one is offering plants for sale one must draw a line somewhere between the common convenience of all and the hair-splitting of the specialist. While my own reaction is that there is far too much hair-splitting (which the collector in the field can easily detect) and am more inclined to agree with the so-called "lumpers," yet to follow either course to the bitter end brings confusion.

This year we have some very fine plants to offer, with many blooming sizes for those patrons who enjoy seeing their plants in bloom. Last year we were very pleased at the great number of plants we were able to send in bud or flower.

OUTDOOR CACTI

One of our "flat yards" where larger plants are grown for flowering. Here they grow under as near natural conditions as possible, developing sturdy root systems and having a good winter's rest, thus getting a fine start for the spring and summer flowering. We have many thousands of these plants, all more than three years old.

CACTUS COLD FRAMES

The plants shown here are the bright spined Peruvocereus and Haageocereus. When the plants have reached a degree of size and hardiness in the seedling houses, they are moved to these frames where they get a greater degree of heat and light and air. Clean, bright spined, strong rooted plants result.

Mamillarias

or Pincushion Cacti

FOR window gardens no other group excels the lovely Pincushion Cacti. They are easy to grow and to flower and always present a cheerful appearance. There is an infinite variety of them and most may be grown to flowering size in a three-inch pot. The flowers of some of the prettiest appear in the winter, the bright red petals nestling in the snowy, cottony puffs which appear at flowering time in rings about the crown. Some seem to be in flower almost all the year. The fruits of many are bright red and spring forth red-ripe almost within a day. They are found chiefly in Mexico growing on the mountains and plateaus or clinging to canyon walls. Some are solitary, some clustering and some form great mounds of a hundred heads, each pressed so closely to its neighbor as to be hexagonal. The spines of none are very sharp or wicked. Some bear silvery white spines so intricately locked the green plant beneath cannot be seen; others have golden stars tipping each small nipple, some bear long, silky hair, others are like cotton bolls, and one bears "feathers" as soft and white as eiderdown. Some, as Golden Stars and Thimble, shortly begin to cluster, some flower almost the first year from seed, though generally they take two to three years. Most of the plants we sell are two to three years old, the larger sizes often many more. The white or golden spined species are to my mind the prettiest though the vivid blossoms of the Flame Pincushion, the Rose Pincushion, Ruby Dumpling, etc., are lovely for long months.

Culture. The great majority of Mamillarias require no special care and thrive if given the same treatment as your other cacti. A soil of 1 part loam, 1 part gritty sand, 1 part leafmold suits them well. If the loam used is sticky, double the amount of sand. Give them a sunny location in the window and plenty of fresh air whenever possible. Water lightly, never saturate Cacti and Succulents, so the soil dries out in

about five days. After watering open the window if not too cold or inclement, particularly for the first few weeks after planting. When planting, spread the roots out and sift the soil among them, tapping the pot on the table to settle the soil and pressing with your thumb. Pot firmly but don't ram the soil down hard. You will be surprised at what a successful gardener you will shortly become.

GENERAL LISTING

Mamillaria aureihamata. A rare species of the Powder Puff group. Spines vary from pale yellow to reddish. 1"-2", 75c and 50c

Mam. Bertrandii. A rare species, 1"-1½" 50c

Mam. bombycina. One of the loveliest of all. The Silken Pincushion has white wool, yellow spines, pink blossoms. Beautiful, 2". Each 75c
3"-4" \$1.25

Mam. Celsiana. Handsome. Yellow spines. 1". Each 35c

Mam. calacantha. Very fine. 1" 25c

Mam. centricirrha. Large growing. 1"-1½" 35c

Mam. cephalophora. Rare and handsome. Small flowering 75c

Mam. caput medusae. 1" 35c

Mam. carnea. 1½". Nice 35c

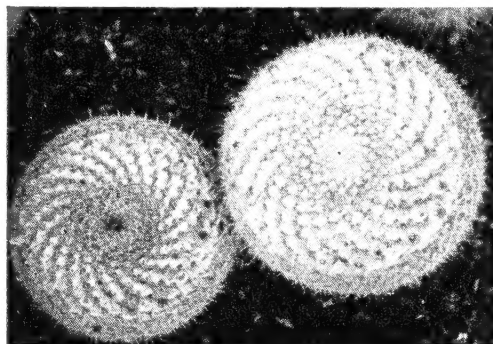

Mam. decipiens. Cluster forming 25c

Mam. dealbata. White spines. Large flowering plants, 4"-5" \$1.00

Mam. ebenecantha. 1" 35c

Mam. echinata. Lovely yellow spines 35c

Mam. elegans. 2"-3" flowering specimens 75c

DIADEM CACTUS

Don't fail to have this lovely winter flowering cactus. The bright red flowers are a beautiful crown nestling amongst the white hair and spines. The flowering areoles of Mamillaria Werdermanniana are full of snow white wool. They flower in mid-winter and always attract the greatest attention among our visitors. 35c
Small flowering size 50c. Nice plants..... 35c

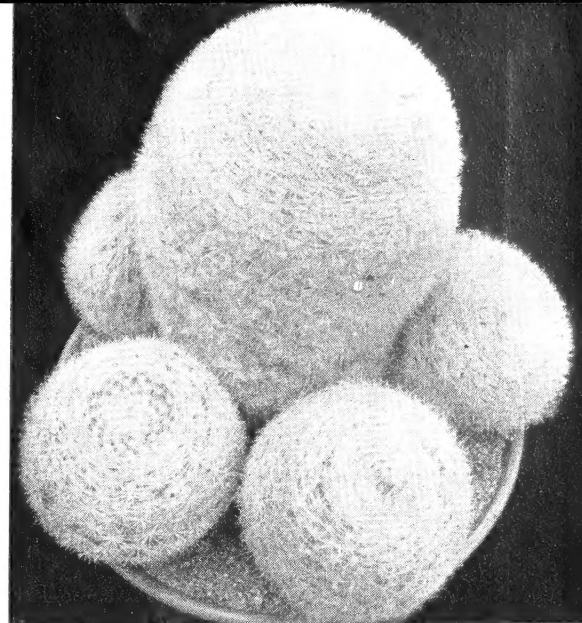

Mam. formosa. 1" 35c

Mam. fuliginosa. 1" 35c

Mam. Galleotii. Orange red flowers. 2"-2½" 50c

Mam. hidalgensis. Red flowers, 1" 25c

Mam. Hoffmanniana. 1" 35c

SNOWBALL PINCUSHION

An exquisite plant of purest white Mamillaria candida forms nice specimen clusters. One of the loveliest of white spined cacti. Likes a sandy soil and plenty of light. Nice plants, each 50c

Mam. Haseltonii. Like Hahniana 50c

Mam. Johnstonii. Rare 50c

Mam. ocotillensis. Rare. 1" 35c

Mam. perbella. 2½"-3", 2-4 heads \$1.00

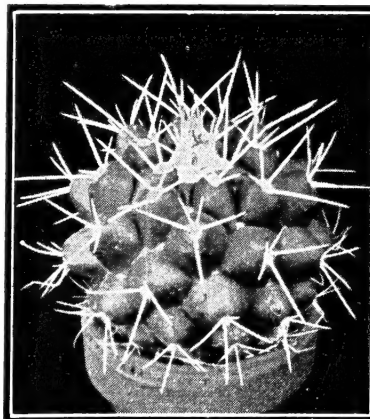

Mam. psuedocrucigera. 3", 2-4 heads \$1.25

Mam. pentacantha. 1"-2" 35c

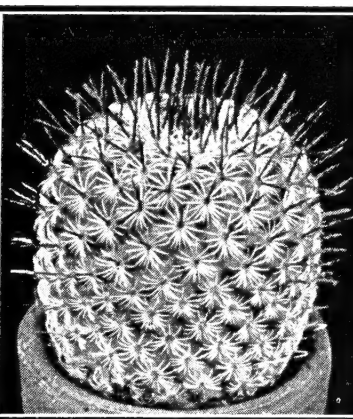

AN INDIAN CACTUS GARDEN

A Moslem friend, Rao Saheb Uttamlal Muljibhai, sends this photograph of his fine cactus collection. We have many collectors also in Siam, Hongkong and the Philippines.

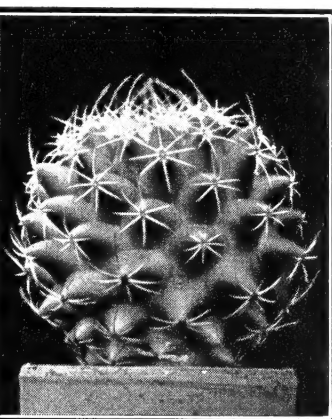

MOTHER OF HUNDREDS

Mamillaria compressa
A pretty variety with white spines and brilliant ruby-red blossoms embedded in puffs of white cotton, giving the plant the appearance of being covered with snow. It branches eventually, forming close packed mounds with scores of heads. Flowers in winter. 2", 50c. Nice 25c

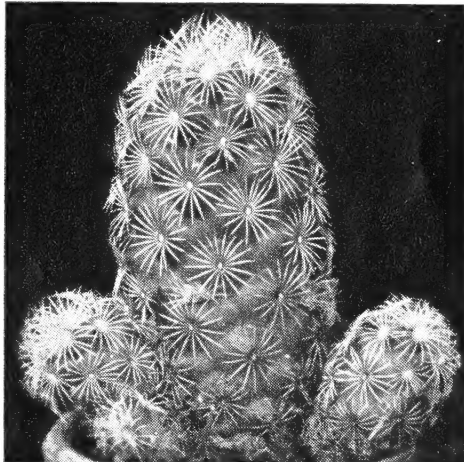

VAUPEL'S PINCUSHION

Mamillaria Vaupelii
One of the prettiest of the smaller, richly colored Pincushions. Beautiful when the sun is shining through the glossy amber spines! The plants are solitary and may eventually reach 3" across. A Mexican species. 2", 60c. Nice 35c

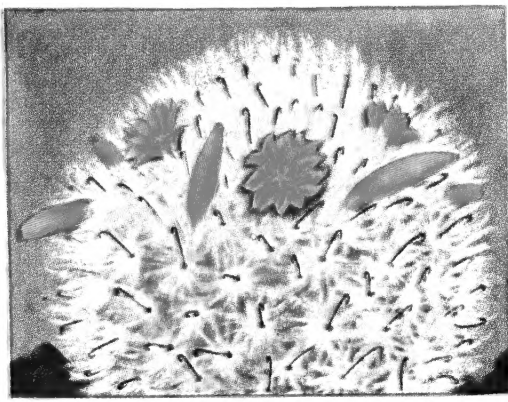

PINCUSHION

Mamillaria kewensis
A rapid growing species often reaching a foot in height. At first solitary it may branch with age. The plant is dark green with dark radial spines. At blooming time the head is covered with white wool. 3"-4" flowering specimens 75c. 1" 30c

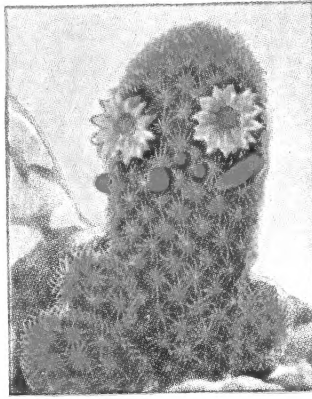

GOLDEN STARS

The lovely, popular Mamillaria elongata should be in every collection. Each nipple is tipped with a shining Golden Star. Easily grown, branching freely. Specimens easily reach 6" with 100 arms. Sandy soil, sun or partial shade. Large 4" several heads, 50c. Small branched, 35c. Single 25c

POWDER PUFF (*Mamillaria bocasana*)

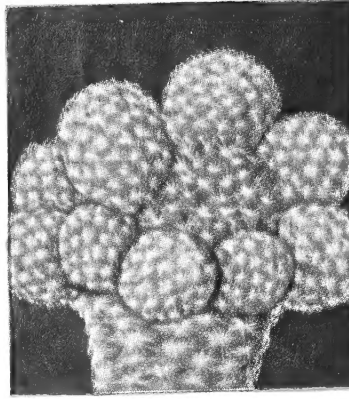

Like a bursting cotton ball, this little plant is clothed with silky, snow-white hair instead of spines, though it bears one tiny hooked one on each slender nipple. Bears cream colored flowers and very attractive bright red, curved seed pods. A jewel among cacti. Very easy to grow with sun or partial shade, moderate waterings. Nice plants to 1½ inches. 35c.
2 inch flowering, 50c. Nice..... **25c**

ROSE PINCUSHION

Mamillaria Zeilmanniana

One of the best blooming of all cacti. In the early spring it bears its cheerful, dainty, dark pink blossoms in great abundance. They are large, and even small plants bear a circlet. 50c and 35c

ORCHID CACTI

or

Epiphyllums

THE largest flowered and most brilliant of all plants that may be successfully grown as house plants. The Epiphyllums we grow today have been greatly hybridized and during the past 50 years literally hundreds of new varieties have been raised. Their colors are remarkably clear and bright and run the gamut from white, white and gold, pink, orange, scarlet, crimson and glorious bi-colors with glowing electric violet throats and red petals. The flowers now last several days and even Orchids pale beside their vivid coloring. They are not desert plants but are found in Mexican or Central American forests either growing on rocks or high among the branches.

They vary considerably in shape, some starry with cupped center petals, others bowl shaped, while some are massive with ruffled overlapping petals, the center a cascade of snowy, thread-like stamens. In size they range from four inches to as much as ten inches in diameter. With proper care they are astoundingly free in flower and quite at home in the window garden.

Culture. In general they should be treated as one would a Begonia or even a Geranium. They enjoy a soil of 1 part loam, 2 parts sand, 2 parts leafmold. Almost any soil that drains quickly and has a good proportion of humus suits them. Do not overpot them. A 4-inch pot for their first potting is ample. Spread the roots well and distribute the soil, tapping the pot and firming well with the thumb. Water lightly after potting and give as much fresh air as you can. They should be allowed to almost dry out before watering again. Never keep them wet for any length of time. Shift to the next size pot when full of roots. They like some sun but in summer shade from the midday rays. They winter well where night temperatures are above 45°. In California they are safe above 26°. They flower in April, May and June.

Oriole. Very lovely with contrasting yellow and white petals. Each.....75c

Hermosus. Strikingly beautiful. Brilliant blue-purple throat with bright red outer petals. Each.....\$1.00

Valencia. Very free blooming. Inner petals orange yellow darkening to red, with touch of violet in throat.....75c

30c

OPUNTIA

THE Opuntias grow very easily and are the most widely known of the cacti. Many bear edible fruits and many have strikingly beautiful flowers. There are hundreds of different kinds, some with flat pads, others with cane-like joints. Some are tall trees, others low mats. Some, like the Old Man Opuntia, bear woolly white hair. They all have considerable decorative value. Every window garden should have some. They are found from Canada almost throughout the United States and south to Argentina and from the coast to over 15,000 feet in the Andes.

Culture: They prefer a loose, sandy soil, watering lightly whenever dry. Give them a light or quite sunny window.

Consolea rubescens—A very handsome spineless plant with mahogany or almost black-green, shiny, flat "leaves" with light areoles. The "leaves" keep growing indefinitely in length. Charming at all times. Nice plants, each.....

40c

25c

ECHINOCACTUS

Beautiful Barrel Cacti

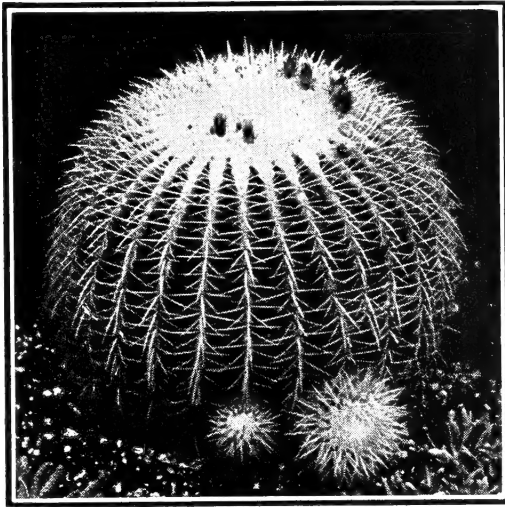

The Echinocacti are a large natural group of globular-shaped Cacti generally bearing ridges. Some are quite tiny, others grow to a huge size. Many bear very lovely flowers with exquisite satiny petals in all shades of red, pink and yellow. The Barrel Cacti are familiar sights to tourists in our southwestern states. There is an endless variety of them found on the plains and desert mountains all the way down to Patagonia. Globular types are grouped here though some are more related to Cerei.

Culture: A soil composed of 1 part loam, 1 part sand, 1 part leafmold suits them well. If the loam is sticky add another portion of gritty sand or small gravel. We offer a very good type of leafmold on page 10. When potting use a pot about one and a half times the diameter of the plant. Most nurseries or seed stores can supply 2½ to 3 inch or 4 inch pots. Sand can be had at pet stores as "bird gravel" or at builders' supply yards. Water only enough so plants will dry in about 5 days. Give plenty of fresh air whenever possible and a sunny window.

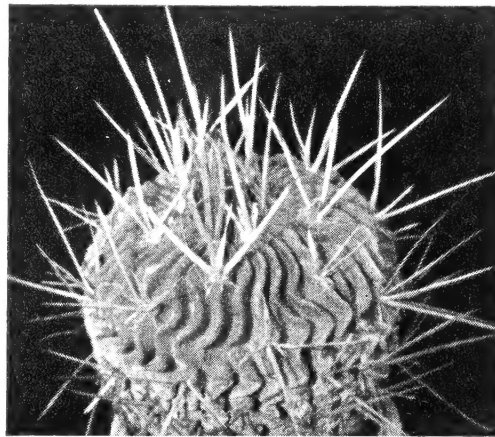

DAM'S CHIN CACTUS

If you want the easiest flowered cactus try Gymnocactus Damsii which bears its lovely large pink and white flowers throughout the spring and summer. Even tiny plants flower. Seldom reaches more than 3 inches in diameter. Fine 3 and 4 year old specimens 50c and 75c. Smaller flowering beauties 25c and 35c and.....

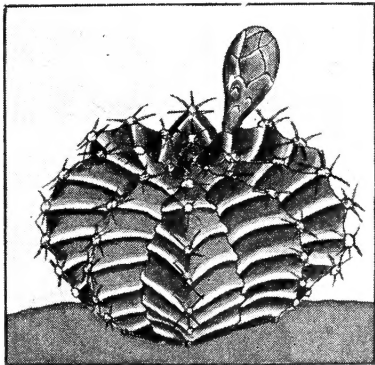

GOLDEN BARREL

Bright Golden Globes. Small plants bear nipples; ridges appearing later. Every collection should have the beautiful Echinocactus Grusonii. Very sandy soil. Nice. 1 inch—35c. Bright specimens 2½ to 3 inches. 75c

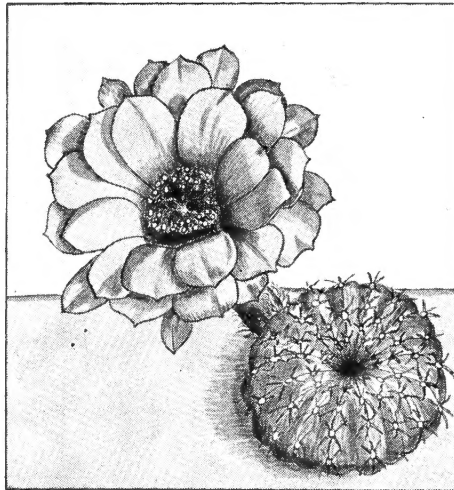

BRAIN CACTUS

The Echinofossulocacti are a very choice group. They bear many thin ribs and lovely purple, pink or white flowers. Grows easily. Nice..... 35c

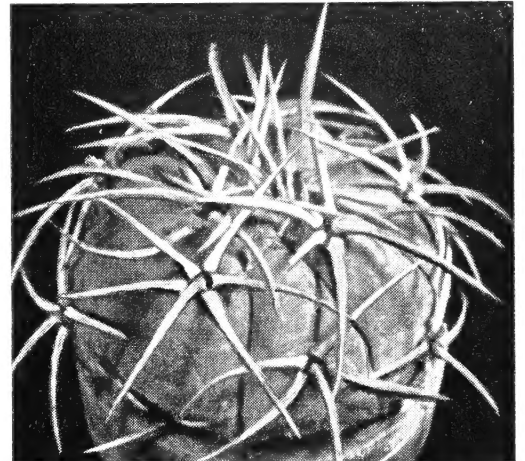

PLAID CACTUS

A perpetual spring and summer bloomer Gymnocactus Mihanovichii stenogonum bears charming chartreuse yellow blossoms. Almost always has buds when shipped. 3 to 4 years 50c and 75c. Smaller flowering..... 35c

SNOW CUPS

A very free flowering plant with dainty, ruffled white blossoms. Everyone flowers it. The charming Echinopsis Kratochviliana grows in the high mountains of Argentina. Likes plenty of water in summer. Semi-shade. Blooms in May and June. 3 to 4 years, specimens 50c and 75c. Smaller 35c and..... 25c

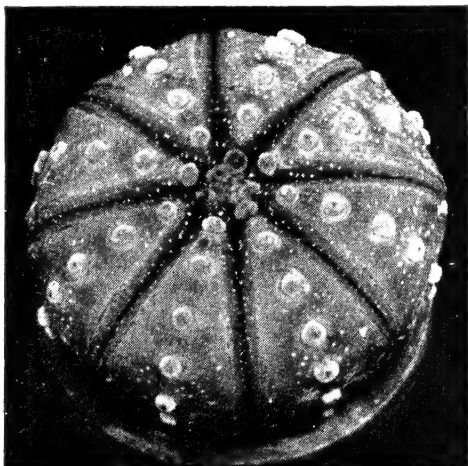

EAGLE CLAWS

An old favorite bearing brilliant, large pink blossoms like crumpled silk. The blossoms of Echinocactus horizontalis arise from the very wool-matted crown. Pale blue-green plant with stout, red, curved spines. From Western Texas. Sand with some leafmold and full sunlight suit it. Large specimens 75c and \$1. Nice flowering specimens 2½ inches to 3½ inches..... 50c

Astrophytum ornatum Mirbellii. A choice, very white-flecked variety making grand specimens. Even the smallest plants are lovely. 1½-2" each 50c

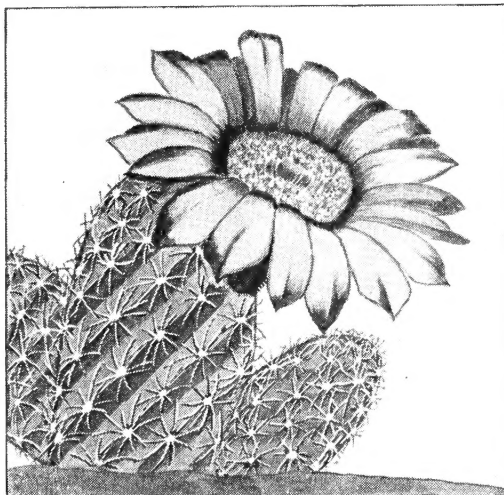

STAR CACTUS

Every collection should have the handsome Astrophytum ornatum. An old favorite of easy culture. It is beautifully flecked with a myriad of snowflakes. Even the tiniest plants are perfect miniatures. Bears large, lemon-yellow flowers. Grows freely, sun or part shade. We have a very nice lot of them. 1½ to 2 inches, each 50c. 1 inch or more..... 35c

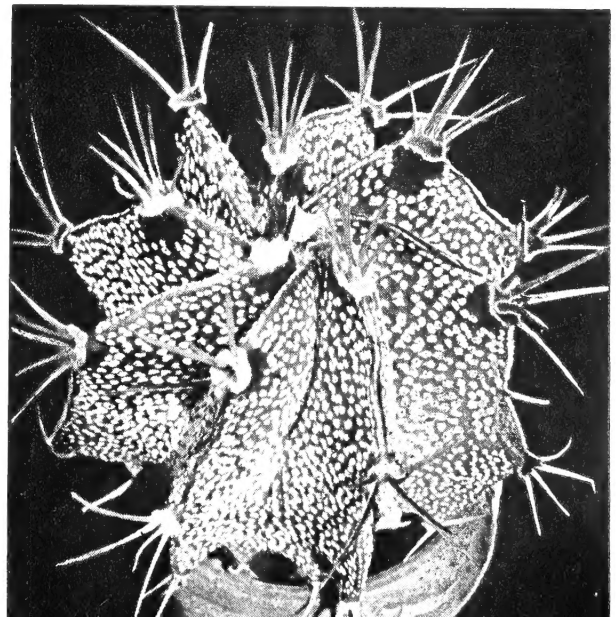

SAND DOLLAR

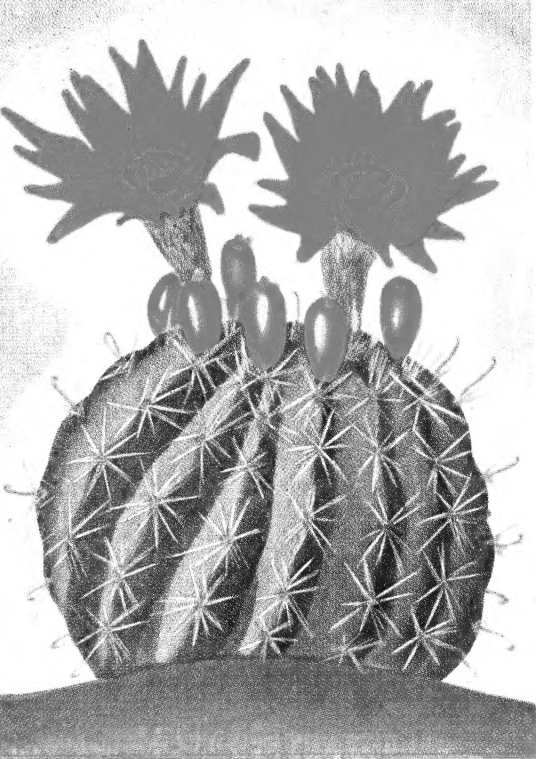

One of the oddest cacti, entirely spineless and freely bearing large yellow blossoms with a red throat. Very rare even in the wilds where it grows thinly scattered on the desert mesas. Best potted in sand with a portion of leafmold, watering lightly when dry. Give it a very light position with some sun. It flowers from May to October. Well rooted, established plants. Specimens 3 to 4 inches, 85c. Flowering size to 2½ inches. 60c

LOBIVIA NEALEANA

Brilliant red flowers. Forms neat clusters of many heads. Nice 3 year old flowering size plants..... 40c

STRAWBERRY CACTUS

A group of *Hamatocactus setispinus* is never without flowers in the summer. It is a favorite with all, growing freely and of the easiest culture. The flowers are rather larger than shown and the brilliant scarlet fruits are quite showy. Enjoys a light loam, sun or part sun, watering when dry. Large specimens, 3"-4", 50c. Smaller, 1½"-2" flowering..... **35c**

ASTROPHYTUM

A grand group to which the Bishops Cap belongs. They are all free flowering and easily grown natives of Mexico. They make fine specimens for the window garden never getting too large. Their bold forms give them distinction. They like a sunny window and ordinary cactus care.

Astrophytum myriostigma. Bishop's Cap. See photo above.

Astrophytum myriostigma columnaris. A slim, tall-growing form, quite distinct. Large 5"-6", \$2.00, 2"-2½", 50c. 2"..... **35c**

Astrophytum myriostigma tetragona. Four-sided Bishop's Cap. Always has the four sides. 1½"-2", each 50c to 75c. Small 1"..... **35c**

Astrophytum capricorne. Lovely flowers of golden yellow with bright red throat. Very free blooming. Plants speckled with white. They are amongst the loveliest of all cacti! Three years old and should flower—35c and **50c**

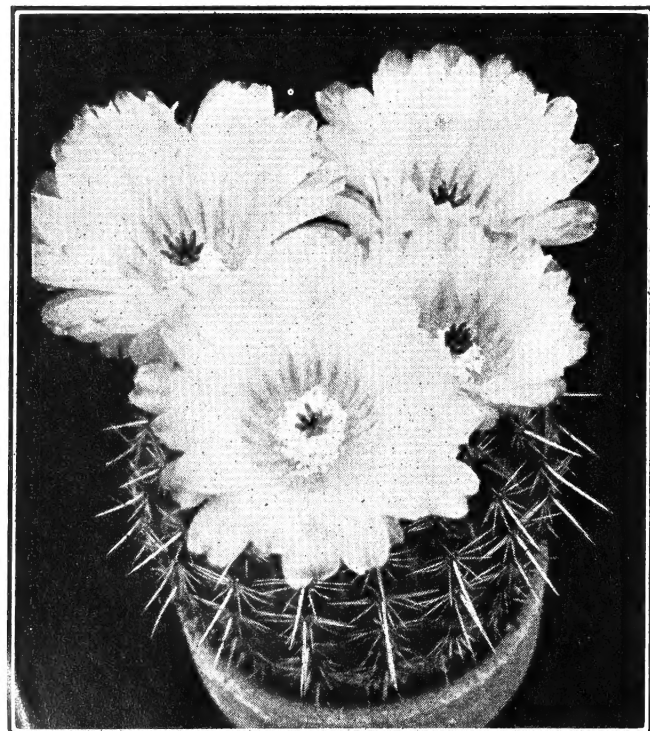

Astrophytum capricorne major. Similar to above, 35c and **50c**

Astrophytum capricorne minor. Each 35c and 50c

Astrophytum capricorne senilis. A most interesting form with curling, papery, black spines. Gorgeous freely borne flowers. Each..... **50c**

NOTOCACTUS MAMMULOSUS

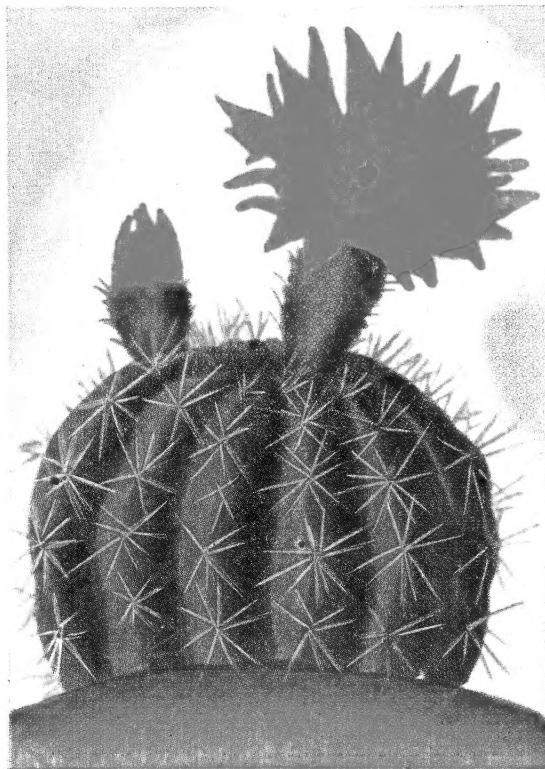

Lively yellow blossoms, each petal like satin. Surprisingly easy to grow and flower. I have some very fine, strongly spined plants that averaged 10 flowers each last year. Every one will bloom this spring. 75c and \$1. Nice plants..... **35c**

NOTOCACTUS

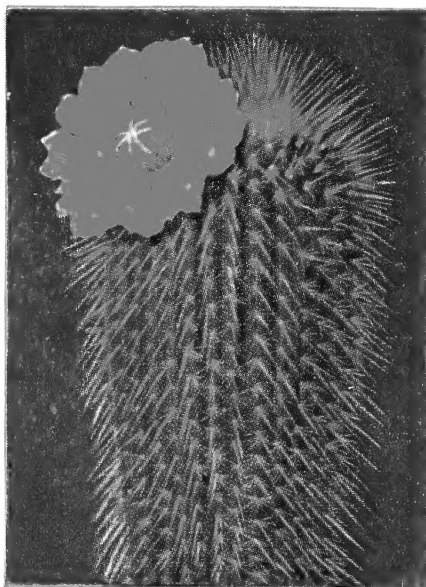

All Notocactus are excellent because of their form, flowers and colorful spines. They are easy to grow, enjoying a light or sunny location.

<i>Notocactus apricus</i> . Sun Cups.....	35c
" <i>caespitosus</i> . Rare. Large.....	75c

INDIAN HEAD

A very pretty, free flowering plant, *Notocactus Ottonis* should be in every beginner's collection. Flowers over a long period and grows easily under a great variety of conditions. The flowers are lovely and it produces several crops. It is not a quick grower and rarely reaches more than 2 to 3 inches in diameter. The buds appear as twists of cocoa-colored wool. 3 to 4 years 50c and 75c. Smaller..... **35c**

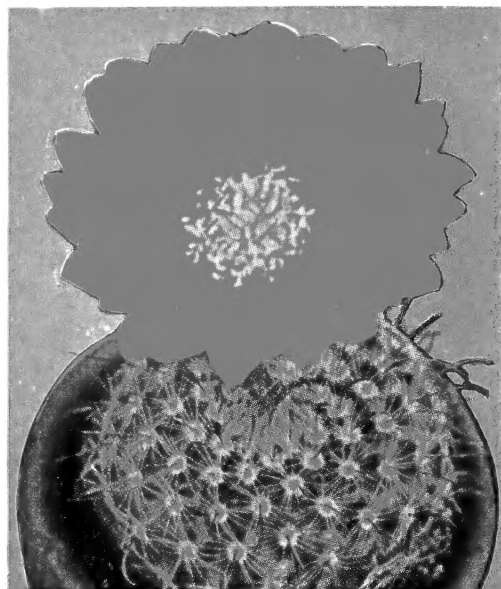

GOLDEN BALL

The lovely, golden haired *Notocactus Leninghausii* is a great favorite and deservedly so. It is one of my favorite plants. Very long lived and easy to grow. Grand old show specimens, 8" to 10" forming clusters..... \$5 to \$7.50
1½"-2½" plants 50c and 75c.
1" colorful plants..... **35c**

BISHOP'S CAP

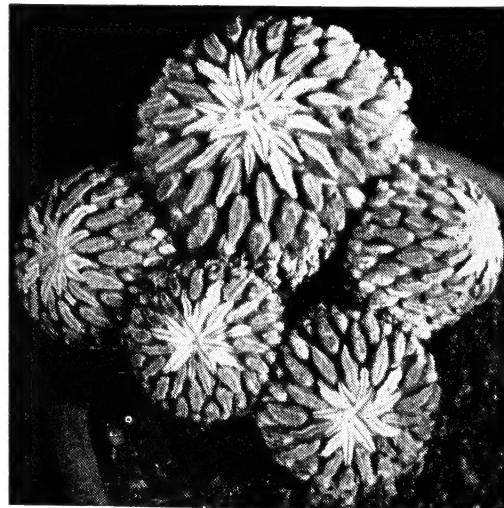

Don't fail to include this fine plant. I have some very clean, bright specimens. Flowers freely all summer. Grows easily. The whiteness of the plant is produced by microscopic, spine-like processes. *Astrophytum myriostigma* likes a sunny window but will do well in partial shade. Flowering size 1½"-2" plants 50c. Smaller—35c and **25c**

TOM THUMB

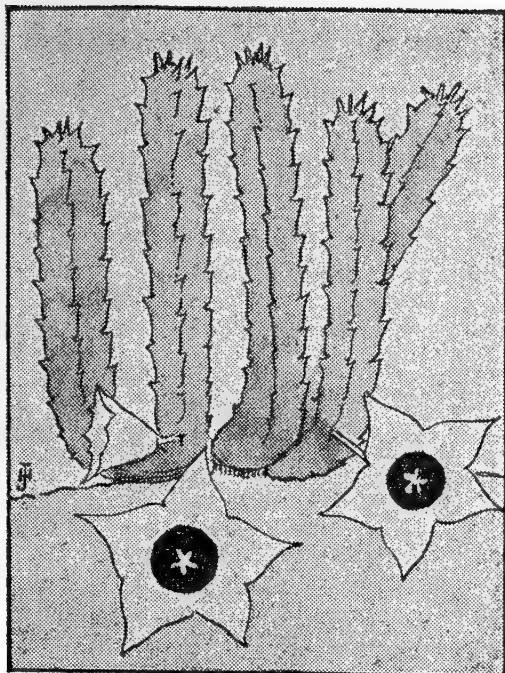

Parodia aureispina is one of our choicest plants. With its lovely golden color or with its bright flowers it is always a jewel. Very easy to flower and we always ship it in bud while in season, May and June. A fast grower. Full sun or part shade. Handsome specimens 5 years. \$1. Smaller 50c and 75c. Nice plants **35c**

Crimson Parodia. *Parodia sanguiniflora*. Brilliant, ruby-red 1½" flowers. Flowering, 75c and **50c**

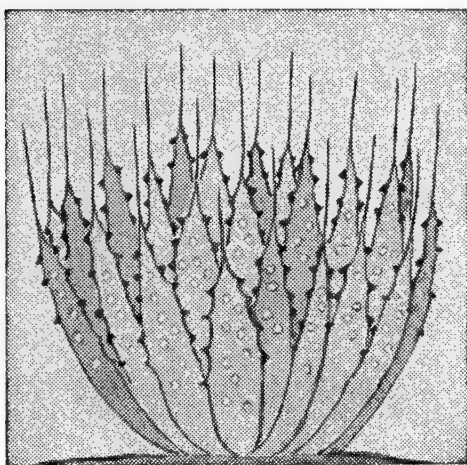

PELECYPHORA ASSELLIFORMIS

Extremely rare in cultivation. The plants are 1" to 1½" in diameter, bearing apical bright purple-pink flowers. Real Mexican oddities. Sand and leafmold makes a good soil. Mature flowering imported..... **\$1.25**

RED DRAGON FLOWER

The pretty *Huernia Schneideriana* bears delicately beautiful flowers with velvety red petals and black center. Flowers all summer, moderate waterings. Sun or semi-shade. Plants 35c and..... **25c**

ALOE ARISTATA

One of the very choicest small Aloes. Bears a great many closely set leaves with white pearly teeth and dots, each leaf terminated by a white awn. Remains small. Flowers red. A rare and elegant plant. Sandy soil. Each 50c and..... **35c**

CACTUS SEED

Cacti grow readily from seed which germinates in from 7 to 30 days, depending upon heat and moisture conditions. You will enjoy trying your hand at growing them. Fresh seed from our own plants. Full planting instructions with every order.

MIXED CACTI SEED

Contains more than 20 kinds, including *Mamillarias*, *Cerei*, *Echinopsis*, *Piptanthocerei*, *Trichocerei*, *Cleistocacti*, *Echinocereus*, *Echinocacti*, etc. Fresh seed. You will have fun growing them. Per packet..... **50c**

DE LUXE MIXTURE

Superb mixture made up of over 75 species of cacti and succulents. There are no weedy species included. Many are rare kinds collected from our own plants. All cacti seedlings are pretty and many bloom within two years. Put up in two packets of fine and coarse seeds. The collection..... **\$1.00**

MIXED LIVING ROCK SEED

There are many kinds of Living Rocks and we have one of the finest collections in this country. All seeds are grown by us. *Pleiospilos*, *Dinteranthus*, *Lithops*, *Lapidaria* and many others are included in this selection. Per packet..... **50c**

MINIATURE CACTI SEED

A choice mixture of the finest toy cacti, including rare *Parodias*, *Notocacti*, *Gymnocylindriums*, *Mamillarias*, *Echinopsis*, etc. Fifteen or more of the prettiest small growing types. Full instructions for planting. Per packet..... **50c**

CHOICE SUCCULENTS

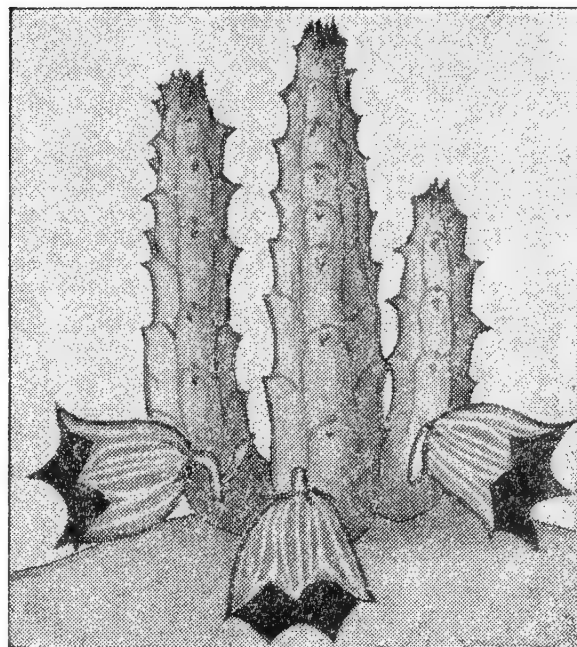

A fine mixture containing many rare species of *Mesembrianthemums*, *Crassulas*, *Cotyledons*, *Echeverias*, *Anacampseros*, *Aloes*, *Gasterias*, etc., from our huge collections. All collected from our own plants. Many interesting things. Per packet..... **50c**

MIXED PINCUSHION SEED

Mamillarias are one of our specialties and this mixture contains a very pretty and representative group. They germinate readily and can be flowered in two years. You will enjoy them. Per packet..... **25c**

HAIRY STARFISH FLOWER

(*Stapelia hirsuta*)

Handsome, velvety purple "stars" 4 inches across each petal fringed with soft violet hairs! They grow and flower freely in small pots. Your friends will never believe these strange African blossoms are real! **35c**

The NEW SAND CULTURE for CACTI

Hydroponics is the scientific name for growing plants in culture solutions. This new science is rapidly proving its worth and for the cactus enthusiast has especial points of interest. One may grow his plants in clean porous sand, thus greatly reducing the danger of overwatering. This is of particular interest to collectors who live in damp, foggy or rainy places. Many choice or difficult plants thrive under this treatment, for cactus roots when well fed enjoy spreading in the air filled sand.

VITAMIN B-1

JOHNSON'S OWN B-1 TABLETS
For use in Any Soil

Works miracles on Cacti and Succulents, often bringing refractory plants into bloom. Don't fail to use this wonder working solution. Better Homes and Gardens tests on cacti report wonderful success attained in flowering slow plants. Particularly valuable to stimulate new root growth after transplanting.

75 Double Strength Tablets with Full Instructions. Postpaid..... 50c

PLANT-CHEM-SALTS

Now Grow Prize Cacti the Easy Way

Cacti grown in pure sand and watered regularly with this nutrient solution make a vigorous normal growth. Contains in scientific proportions the thirty chemicals needed in the growth of all plants.

DIAMOND JUBILEE CACTUS HANDBOOK

Our Diamond Jubilee Cactus Handbook celebrates our 75th year in the nursery business. It contains a great many color plates of cacti and succulents, hundreds of photographs and much information on culture such as how to water, how to rest your plants, etc. Also notes on the native lands of our plants, where they are found, how they are named, and the general lore of cacti.

There will be listings of hundreds of interesting plants, together with sizes and prices of available supplies. It has been impossible to list in our smaller yearly catalogs many items that have been available in the past.

Cactus Handbook. 48 pages.
Price..... **50c**

TERMS

Our 1949 and 1950 catalogs are still current.

I GUARANTEE SAFE DELIVERY

ANYWHERE IN THE U. S. OR CANADA

December shipments via express at customer's expense, except for California, Oregon, Washington, Utah, Nevada, Arizona, New Mexico and Texas. These may go parcel post.

Minimum order \$2 for free delivery.

50c packing charge on orders less than \$2.

How to remit: By check, postal note, money order or stamps.

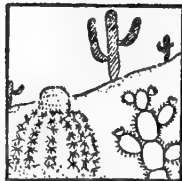

No C.O.D. orders accepted.

How we ship: By parcel post, which delivers direct to your door. All plants are passed by State Horticultural Inspectors to insure freedom from insect pests. They are packed by experts in especially made boxes heavily insulated from cold and clearly marked: "Rush—Perishable—Tender Plants."

Our guarantee is for safe delivery. We cannot undertake to make good plants lost through improper care. If plants are injured in transit and we are notified immediately, we will give credit for all damaged items.

Supplies for Cacti

Few things are needed in the growing of cacti more than interest and a desire to form an increasing collection of them. However, for the city dweller and more serious collector I am offering a few things that may make their culture easier. The things we offer are the things we ourselves use.

JOHNSON'S CACTUS FOOD

A very effective fertilizer with a good organic base, the ingredients of which are blended and proportioned to help your plants to make normal matured flowering growth. It is not a soluble fertilizer but should be scattered over the soil, a level teaspoonful to a 4-inch pot, three or four times during the growing season after the plants are well established.

Use only during the growing season. Light applications once a month are more effective than heavy applications.

12-ounce Bag **50c**
2-pound Bag **\$1.00**

ROOTWELL

Want to raise Cactus cuttings? Our new hormone powder for rooting refractory cuttings of all kinds designed particularly for quickly rooting Cacti and Succulents. Sterilizes the cut surface and induces luxuriant growth of roots. Apply dry with finger to fresh cut.

Full Directions. Per Package..... **50c**

JOHNSON'S VITAMIN B1

Works miracles on cacti, often bringing refractory plants into bloom. Don't fail to use this wonder working solution. Our customers report success, particularly when used on old plants. Also to stimulate new root growth after transplanting.

75 Double Strength Tablets, with full instructions for Cacti. Bottle..... **50c**

CACTUS AND SUCCULENT SOCIETY OF AMERICA

The Cactus and Succulent Society was organized more than 20 years ago to bring together those interested in these extraordinary plants and to publish a magazine which would provide a forum for the exchange of information and for the publishing of new species and scientific data. The Journal, under the competent editorship of Scott Haselton, has well achieved these aims, and today is the world's foremost publication about these plants.

Everyone is invited to join the Society and to receive this splendidly illustrated magazine. It has many articles on new plants, stories on exploration trips to new localities, articles on culture, news of affiliated Cactus Clubs in every region of the U. S. Everyone interested in Cacti and Succulents will continue to find this a most interesting magazine.

Membership and Journal **\$3.00**
Six double issues a year.

CACTUS HELPS COLLECTION S 100

Items to make the growing of your plants easier and more enjoyable. Included here are all the things to root and grow your plants except loam and sand. Sand may be purchased from poultry houses or builders. Loam from garden or hillside.

Book, "Cacti and Succulents and How to Grow Them."

75c package Cactus Compost.

Johnson's Cactus Food.

Johnson's Cactus Soil Conditioner.

Quart of Cactus Hardwood Charcoal.

Bottle of Johnson's B1 Tablets.

50 Painted Wooden Plant Labels.

7 Items to make Cactus Growing Easy. Postpaid..... **\$3.00**

JOHNSON'S CACTUS SOIL CONDITIONER

Of great assistance in keeping cacti in good health, it is designed to add the minerals ordinary garden soils often lack. Desert soils are often high in mineral content, for there is little rain to leach them away. A spoonful of my Conditioner placed about a Cactus plant and stirred lightly into the soil will often bring an ailing one back to health. Mix it with your potting soils.

Small Size, 10 Ounces, Postpaid..... 60c
Large Size, 32 Ounces, Postpaid..... \$1.00

JOHNSON'S CACTUS COMPOST

Mix With Your Own Sand and Soil

An economical compost for Cacti and Succulents which when mixed with equal or larger quantities of both sand and light loam makes a very suitable soil for all desert plants. Composed of our recycled sclerophyllous leafmold, lime, gypsum in the proper proportions for all potted cacti. A light and bulky mixture, the same as we use in our own potting soils for both seedling and specimen plants.

Per Peck, Postpaid..... \$1.95

4 Pints or 2 Pounds to Make 6-10 Quarts of Potting Soil. Postpaid..... **75c**

OUR SPECIAL CACTUS LEAFMOLD

A recycled, sclerophyllous desert leafmold, sifted, light and dry. Mixed with equal parts of both sand and loam, it makes a fine, economical cactus soil.

4 Pints or 2 Pounds to Make 6-10 Quarts of Potting Soil. Postpaid..... **70c**

HARDWOOD CACTUS CHARCOAL

Useful in keeping cactus soils sweet and aerated. Helpful in heavy soil.

Per Quart 40c

CACTUS INSECTICIDES

Our special instruction sheet describing common cactus pests and treatment, with spray formulas. We recommend Red Arrow Spray as effective and non-injurious to cacti or other house or garden plants.

Instruction Sheet and Bottle of Red Arrow Spray. Postpaid..... **40c**

VOLCK SPRAY. An oil spray recommended for any kind of scale insect and for mealy bug. These two insects are hard to kill as they have a waxy covering which repels water. We have used it for years, but only recently has it been put up in small bottles. 4-ounce bottle prepaid (with orders only), with chart describing cactus pests. Full instructions for use..... **50c**

BLACK ROT PREVENTIVE

With light waterings, fresh air and sun, rot will not appear. If through too much watering plants turn black and watery, its spread may be checked by saturating the top soil with a Semesan solution. It is useful also to spray tiny seedlings to prevent "damping off" or rotting.

One-third-ounce Envelope, with cactus instructions **20c**

Two-ounce pkg., with cactus instructions **50c**

PLASTIC PLANT LABELS

You may write with pencil on these labels and it will remain clear for years. As near a permanent label as I have tried.

Pure white, 6-inch, pot labels, per 100 **\$1.75**

PLANT CHEM SALTS

Cacti grown in pure sand and watered regularly with this nutrient solution make healthy vigorous growth. An occasional watering of all your house plants will supply the rare minerals sometimes lacking.

16-gallon pkg., with full instructions..... **30c**

100-gallon pkg., with full instructions..... **\$1.10**

400-gallon pkg., with full instructions..... **\$2.10**

WAIT-A-BIT

Our plants of *Ancistrocactus Scheerii* are all mature flowering specimens. The flowers are produced in the spring. Easily grown, 3½ to 5 inch, 40c 60c. 2 to 3 inch.

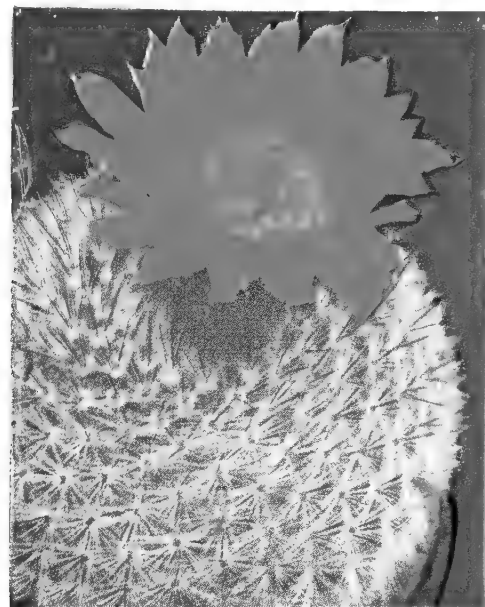

NOTOCACTUS PAMPEANUS

A quite easily grown and flowered cactus from South America. The bright blossoms appear in the spring after the winter rest. Thrives in a well lighted window liking an open soil. Stands temperatures of 15°. Nice 1½ inch plants, 50c. Smaller, 35c

ROSE PLAID CACTUS

A handsome small cactus brightly banded with copper-green and cream. The lovely pink blossoms of *Gymnocalycium Friederickii* are large and exceedingly freely borne all summer long. Specimens, 4 years, 75c Smaller flowering 50c and, 35c

SILVER BALL

An elegant small cactus well pictured above. *Noto-cactus scopia* is a native of Brazil with silvery, thickly set spines. Every collection should have this colorful plant. Flowers lemon-yellow each plant bearing 6 to 12. The furry buds are brown appearing in a ring about the crown in May. Very easily grown. 5 years old \$1.00, 1½ inch, flowering, 75c. Nice 2 to 3 year plants 50c and, 35c

PINK EASTER LILY CACTUS

A quick growing winter hardy plant, even in Canada, when well protected by snow. *Echinopsis multiplex* bears 6 inch, lovely pink, easter lily-like trumpets. It will flower several times during the summer. A fine window plant as it will grow in sun or shade. Large 3 to 4 inch specimens, 75c and \$1.00. Smaller, 50c and, 35c

GYMNOCALYCIUM

The Chin Cacti flower freely and are lovely. Plants just right for window garden. All are very worthwhile. Lack of space precludes descriptions. *Gymnocalycium Anisitsii*, 2 inch to 3 inch, \$1. *G. Baldianum*, 35c and 75c. *G. Bodenbenderianum*, 35 and 75c. *G. Bruchii*, 50c. *G. Gibbosum*, 50c. *G. gibbosum Schlumbergerii*, \$1. *G. hyptiacanthum*, 50c. *G. Leeatum*, 50c. *G. leptanthum*, Lovely, 50c-75c. *G. Monvillei*, 50c-75c. *G. Multiflorum*, 50c. *G. Occultum*, 35c. *G. Quelhianum*, 35c-50c. *G. Venturianum*, 50c.

PYRRHOCACTUS

The Flame Cacti, are seldom seen due to their rarity. They are strongly spined, barrel-shaped plants from Chile with dark red flowers. Slow in growth but of easy culture.

Pyrrhocactus horridus. Strong, curved spines, Canelian-red flowers. A vigorous, bold plant. 2½ to 3 inch, \$1. Nice plants, 40c.

Pyrrhocactus umadeave, 2 inch, 75c. Smaller, 50c.

Pyrrhocactus species. A new clustering species, 50c.

CHILENIA

Chilenia accutissima, 2½ to 3 inch, 75c

Chilenia heteracantha, 2½ to 3 inch flowering, \$1

Chilenia heteracantha, 1 inch, 35c

Chilenia castaneoides, 2 inch, 75c

Chilenia nigrihorrida, Small, 35c

Chilenia subgibbosa, 1½ to 2 inch, 50c

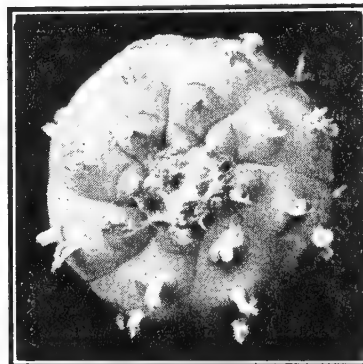

Arequipa leucotricha

Lovely white spined plant. Red flowers. Each, \$1.00

Islaya islayensis

Very rare, \$1

Islaya minor, \$1

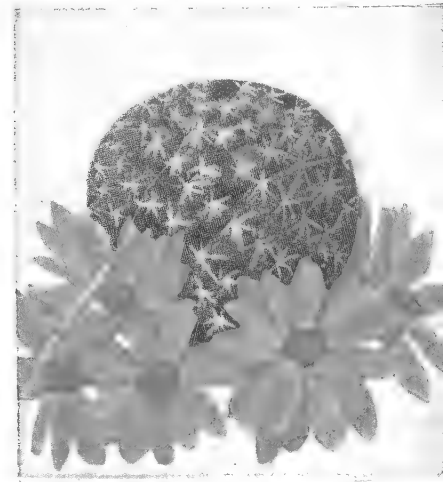

SACRED MUSHROOM

Lophophora Williamsii or Peyote is chewed by Indians in religious festivals. Pink flowers. Mature specimens 1½ to 2½ inch, 50c

VIOLET SEA URCHIN

A lovely flowered small cactus blooming profusely during the summertime. The blossoms of *Acanthocalycium violaceum* are particularly bright and shining and the color is most pleasing. Flowers when small. Seldom reaches more than 3 to 4 inches in diameter. Grows easily, sun or part shade. Large 3 to 4 inch specimens, \$1 and \$1.50. 1½ to 2 inch, flowering 50c. Smaller, 35c

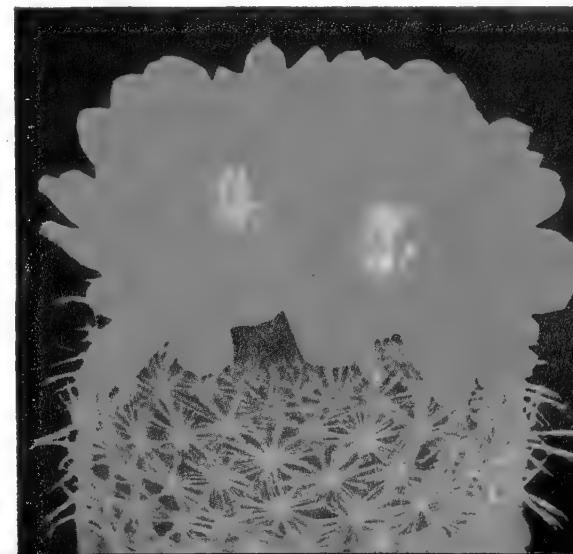

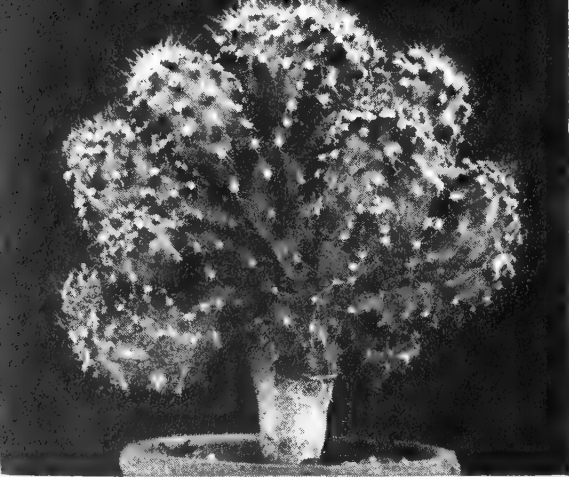

RED CROWN

This year I have some very fine three-year-old plants of *Rebutia senilis*. They are unbelievably floriferous when well grown. I have seen plants with over 100 blossoms. They should be shaded from the noonday sun. Moderate to generous waterings. Large, 50c. Nice flowering, 35c

PARODIA MUTABILIS

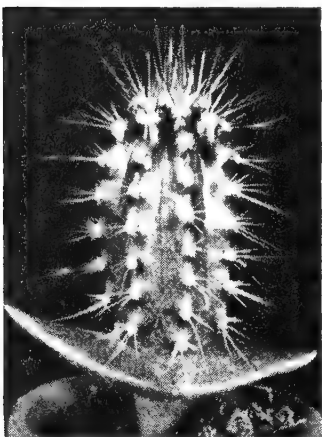

The *Parodias* are all lovely plants with beautiful and bright blossoms. This sterling variety has orange yellow flowers, often with red throat. Even small plants produce several blossoms in May and June. The plant is very elegant and free blooming. Of the easiest culture. Light loamy soil, moderate waterings, sun or semi-shade. Large 5-year-old show specimens, \$1.50. 2 inches, 50. 1-1½ inch, 35c

CURIOSITY PLANT

These novel and attractive cacti never lose their odd contorted growth. They are always pretty with their bright chestnut spines and living green stems. *Cereus peruvianus monstrosus* of this type is very rare. **35c**
Fine plants, 50c and.....

NATIVE COMB

A very pretty pot plant. Indians use the dried seed pods of *Pachycereus pecten-aboriginum* for excellent combs. Plants are copper-colored with light spines. In the wilds it grows to large tree size. 2½ to 4 inches. **25c**

PHOTOGRAPHS

We are always glad to receive pictures of yourself with your collection. For those used \$5 credit is given. Everyone enjoys seeing them.

CACTUS AND SUCCULENT JOURNAL

Why not subscribe to this most interesting magazine? It is beautifully illustrated, describes many new plants, has splendid articles on the plants in their native lands. Lots of cultural notes. Membership in the Cactus and Succulent Society of America includes the **\$3.00** Journal. Per year only.....

PERUVIAN OLD MAN

Everyone admires these handsome soft, white-haired plants. They are clothed with silky, snowy floss. *Espos-toa lanata* grows easily and quickly. Likes a little charcoal in the soil and a well-lighted window. **35c**
Nice 2"-2½" 50c. Smaller.....

CEREUS and its ALLIES

THOSE who have travelled through Arizona have seen the gigantic, fluted columns of the Sahuaro. Other members of the family are no larger than your thumb. Some kinds are climbing, others creeping, others branched trees. The flowers of many are gloriously beautiful, huge chalcices sparkling in the early morning sun. They are found from the south western states south almost to the end of the Andes. There is a great diversity in the flowers and fruits and in the kinds of spines or hair they produce. The *Cephalocerei* at flowering time bear masses of silky-white floss in which the flowers and fruit nestle. The Night Blooming Cerei are often epiphytic and are found growing high in the tree tops sharing the sun with the orchids and Bromeliads. They grow from the coastal bluffs to over 13,000 feet in the Andes.

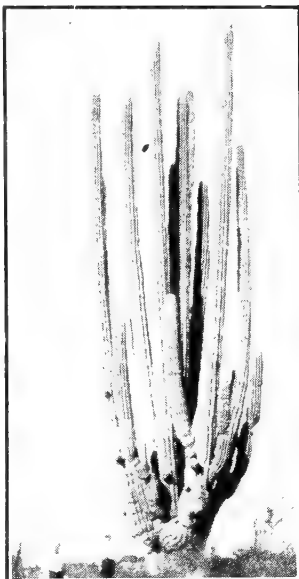

Culture. With few exceptions they are vigorous growers and are of easy culture, presenting no particular problems to the cultivator. They have vigorous roots and thrive in a compost of 1 part loam, 1 part gritty sand, 1 part leafmold with a sprinkling of soil conditioner.

The white-haired kinds enjoy a good dash of granulated charcoal to further loosen the soil. They prefer a sunny window but will grow in any light situation. Allow them as much fresh air as possible.

SILVER TORCH

An easily grown plant every collection should have. Bright red flowers in summer. Makes many 'pups' around the base. A handsome hardy plant, standing temperatures to 15° above. Sun or part sun. 6"-8" specimens, 50c. **25c**
4" to 5" 35c. Smaller.....

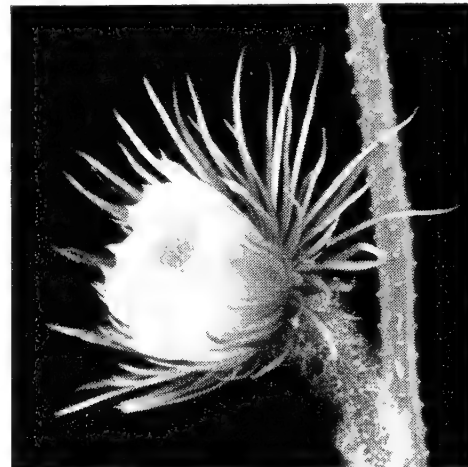

GIANT MEXICAN CEREUS

The small plants are very pretty and grow quite well. The above photograph of *Pachycereus Pringlei* I took in Baja California. Fine specimens 5" to 7", 50c and 75c. Nice miniatures, **25c**
2" to 3".....

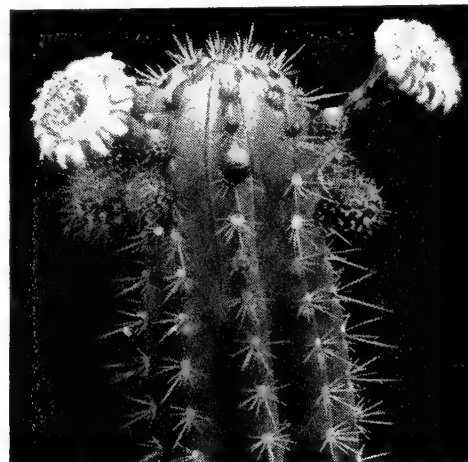

CACTUS SOIL CONDITIONER

Contains the minerals many soils lack. Desert soils are high in mineral content. Mix in potting soils. **60c**
12-oz. package.....

PRINCESS OF THE NIGHT

A glorious white and gold blossom 10" across! The best of the Night Blooming Cerei. *Selenicereus pteranthus* can be readily flowered. Sandy loam, leafmold with generous summer waterings. Harden growth in fall with sunlight, less water. **40c**
5"-8".....

POWDER BLUE CEREUS

Small plants of *Lemaireocereus pruinosis* are lovely blue stemmed pot plants. Colorful, easy to grow. Nice 35c and..... **25c**

BRAZILIAN ROCK CACTUS

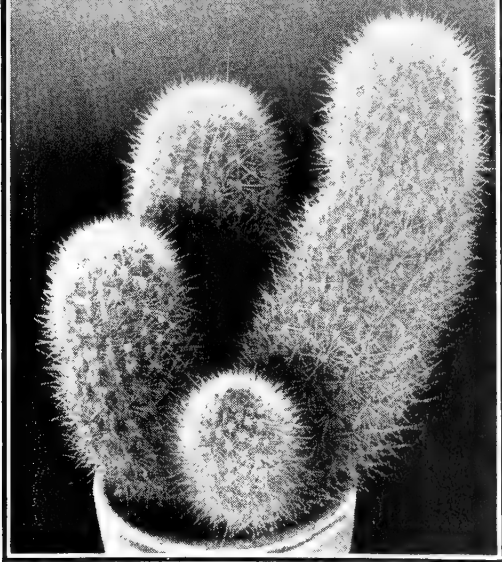

A thoroughly worth-while cactus for those who like flowers. *Monvillea Cavendishii* blooms with amazing consistency when treated generously. The white blossoms are followed by 2" ovoid fruits, crimson and good to eat. Rich loamy soil, generous waterings, sun or part shade. 5"-7" **35c**

At Right:

DAYAM'S TREE CACTUS

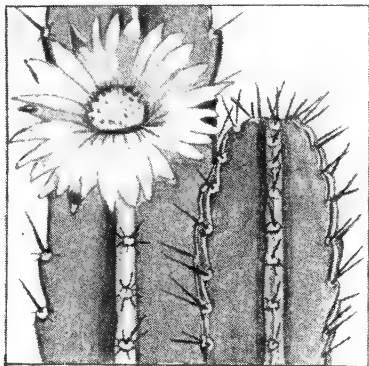

One of the best fruiting and flowering kinds. Bears big tomato-like, half pound fruits quite fragrant and delicious. Tree-like in habit. Handsome as small seedlings. Large plants can be stored during winter in frost-proof basement or attic. 7"-8" 50c. **35c**
Nice.....

FOX TAIL CACTUS

A real show specimen. Peruvocereus chosicensis with its richly colored, bristly spines will be the prize of your collection. Varies from yellow to bright orange, quickly clustering. Lovely white blossoms. Sandy soil with some charcoal. Handsome specimens, 2"-3", 50c and 75c. Smaller 1" **35c**

CEREUS MILESSIMUS

A fine tree cactus with snowy blossoms. Delicious red fruits 2" in diameter. Fine quick growing pot plants. Very spiny. Nice, 5"-7", 50c. Smaller, 3"-4" **35c**

Cereus alacriportanus, 5"	35c
Cereus azureus	35c
Cereus caesius, 5"-7"	50c
Cereus hexagonus	35c
Cereus Hildmanianus	35c
Cereus horridus	35c
Cereus Knuthianus	35c
Cereus lepidotus	35c
Cereus Llanosii	35c
Cereus peruvianus reclinatus	35c

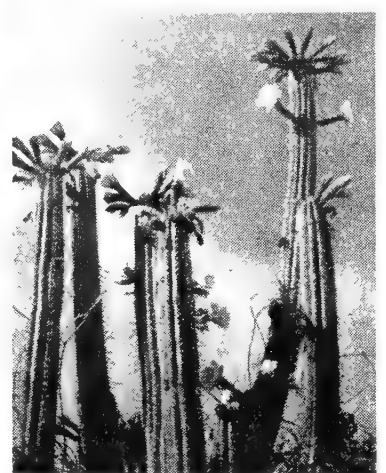

FLOWERING TREE CEREUS

Free flowering and tree-like Cereus goniatus bears many handsome white 5" blossoms with reddish sepals and large red apple-like fruits. The sweet crystalline pulp is very pleasant. The fruits of all the tree Cerei are smooth and spineless. Quick growing. In winter store in basement. 7" to 8", 25c 50c. Smaller 35c and.....

WOOLLY TORCH CACTUS

A handsome Old Man that at flowering time produces masses of white hair. The stems of Cephalocereus Palmeri become a beautiful powdered blue-white with age. The handsome pink blossoms are nocturnal. Six inches, 50c. 35c Smaller.....

PERUVIAN TORCH CACTUS

A fine easily grown plant liking generous treatment. Bears large snowy blossoms. I took this photograph in Peru in February. Grows rapidly. In the valleys it grows tree-like, on steep mountains it may be pendant. Hardy at 15° above. 4" to 6", 50c. 35c Nice

WHITE TORCH CACTUS

Beautiful, popular and exceedingly easy to grow. Trichocereus Spachianus is a quick grower and a fine plant for the window garden. The snowy blossoms are 6" across. Plants branch freely from the base, forming nice colonies. Will stand 15° above zero. 5"-7", 40c. Smaller **35c**

FANCIER'S COLLECTIONS

Collection No. T3

16 Fine plants to start your window garden. All first quality plants. Contains only tested plants such as I would want in my own garden. Nice sizes, correctly labeled..... **\$3**

CENTURY ASSORTMENT

Collection No. T99

100 Different Cacti. No succulents. A collector's group. Includes many rare items. A gift any collector would prize above all else. Labeled..... **\$25**
A very moderate price of only 25c each.....

SNOWBALL

One of the very fluffiest and whitest of all Cacti. The fine silky hair entirely clothes even the youngest plants so that they appear as puffs of white cotton. Psuedoespostoa melanostele is very rare, native of Peru. Grows easily, liking a light loam soil with a little charcoal if you have it. Light to moderate waterings. Sun or semi-shade. Show specimens, 2"-3", \$1; 1½" specimens, 50c. Smaller..... **35c**

NEW ESPOSTOAS

Epistoa huanucoensis. A lovely yellow haired Peruvian Old Man, one of the choicest of new discoveries. I collected the seed in 1948. The plants grow 6 to 8 feet and are much branched with white fragrant fruit. Nice specimens 1½ inches **75c**

Epistoa mocupensis. A handsome plant with white hair and red spines. Makes a most noteworthy addition to the finest collections. A very tall growing plant with strict branches. Scarlet fruits. Specimens 3 to 4 inches \$1. Smaller **75c**

Epistoa sp. nova. The whitest of all Epistogas. A slender plant with very silky hair. Only a few 4 to 5 inch specimens available **\$2.50**

AZUREOCEREUS

Azureocereus nobilis is one of the very hand-somest of Cerei with bright, blue powdered stems and stout chestnut colored spines. A vigorous plant standing some frost. Show specimens, 6", \$1.50; 4"-5" **\$1.00**

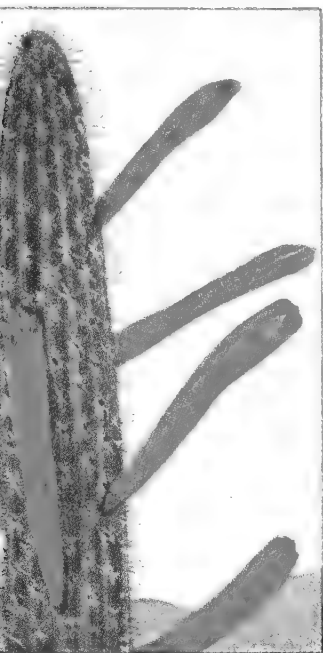

Cereus trigonodendrom. The first time this very rare cereus has been offered. The true plant of Schuman from southeastern Peru. Though described as red flowered and three angled, it bears white flowers with reddish sepals, yellow fruits and 5 to 7 ribs. A very distinct and ornamental species. 8"-10", \$1.50; 5" **75c**

Pink Moon Cereus. Climbing, with lovely pink blossoms. Eriocereus Regelii, 5"-6"..... **35c**

MOON CEREUS

Everyone enjoys the splendid flowering Eriocereus Martinii. The chaste white blossoms are followed by large crimson fruits that last for months. The plants pictured had over 100 flowers open. Enjoys generous treatment, sun or part sun. In summer feed Cactus Food. Will stand 15° of frost. When blooming these Argentine cacti need a 6 or 8 inch pot. Nice 4" to 6" **35c**

SCARLET BUGLER

The fast growing, slender Cleistocactus Baumannii forms a cluster to two feet tall. Bears its bright red blossoms all summer long. Very satisfactory and easy to grow. **25c**
Nice plants, 35c and.....

JOSEPH'S COAT

Handsomely variegated with white, yellow, green and pink. An easy to grow favorite. Opuntia monacantha variegata likes sun or partial shade, moderate waterings. **25c**
Nice plants, 35c and.....

LOXANTHOCEREUS

Handsome red flowered, small cerei from Peru. Form clusters. Our plants are 2"-4".

RAINBOW CACTUS

One of the handsomest and freest dwarf blooming cacti. Echinocereus melanocentrus is sure to flower and has a long blooming season. Often flowers when hardly an inch tall, with blossoms larger than the plants! Easy to grow. Sun or partial shade. Moderate watering. Fine blooming size. **35c**

WEBEROCEREUS

Slender vine-like climbers.

W. Biolleyi	35c
W. New Species. Pink.....	35c

A FINE COLLECTION

Laura Ann and her mother, Mrs. Gibson, of Pittsburgh have collected a very nice assortment of over 85 species. They find it a most fascinating hobby. They have a nice collection of Orchid Cacti also. As may be seen, they grow and flower their plants superbly.

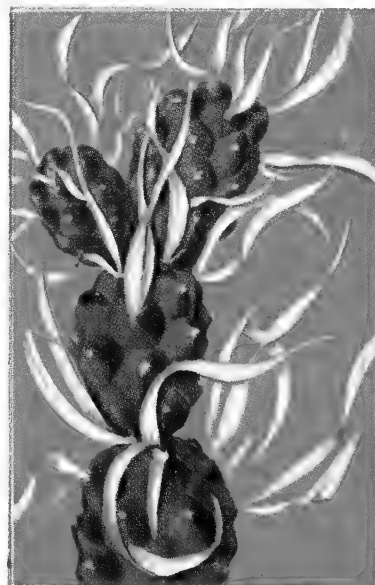

CACTI IN WEST VIRGINIA

I received my first shipment from you last fall and was much pleased with them. I now have about 100 kinds which I keep outside during summer where they grow and bloom very nicely. **STANLEY NUZUM**
Shinnston, W. Va.

HEDGE HOG CEREUS

It hardly seems possible this small plant could produce such large and brilliant blossoms. Echinocereus pentaloophus grows in small clusters and after a good winter's rest bears 3"-5" sparkling blossoms in profusion. Will stand temperatures to 15° and may be wintered in a quite cool place. Three year old clusters, 50c. Smaller **35c**

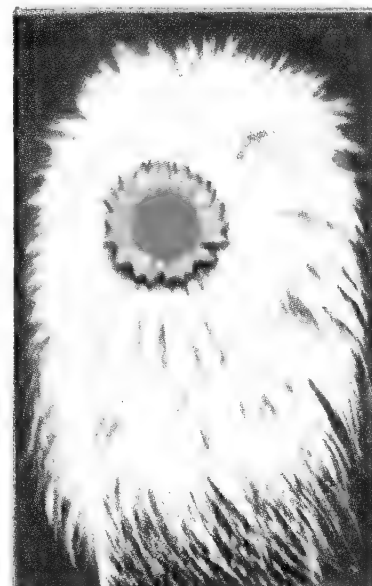

PAPER SPINED OPUNTIA

White paper ribbands for spines! Tephrocactus glomeratus likes sandy soil and sun. Nice plants 35c..... **25c**

CEREUS HYBRIDUS MONSTRUOSUS

A strange and monstrous cactus. Never lose their monstrous growth. Easy to grow. Nice..... **40c**

TRICHOCEREUS

A large group of cacti generally forming clusters. Beautiful flowers. Fine pot plants.

MOON CACTUS

The large, showy blossoms of Eriocereus open in the evening, remaining open until late morning. Easy to grow, liking a rich loamy soil, moderate waterings. Sun or semi-shade. **35c**
Nice, 50c.....

OLD MAN CACTUS

The long, snowy white hair of the widely known Cephalocereus senilis makes it one of the most sought after. A sandy soil, sun, watering lightly when dry. Likes sun. 3"-4", 75c; 2"-2½", 35c; 1"-1½".....

Succulents

THESE colorful and fascinating desert plants are becoming increasingly popular with our patrons. Most of them are at home in the window garden and none of them have spines. Succulents belong to many families of plants such as the Daisy, Milkweed, and Lily families. The Cacti belong only to the Cactus Family. They are found mostly in Mexico and South Africa. Some are popular because of their lovely or curious flowers, as the Echeveries and Starfish Flowers; others because of their odd shapes or handsome colored leaves.

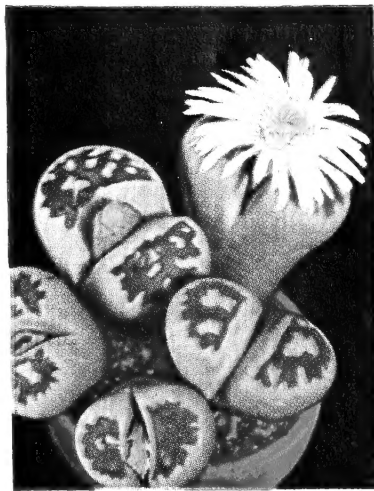

Culture. A soil of one part easily crumbled loam, two parts sharp sand, one part leafmold is suitable though any soil will do. Avoid sticky soils by adding more sand. Water only lightly when newly planted, watering again only when dry. Give plenty of fresh air whenever possible. Don't over-water. They should be dry in about five to seven days after watering.

SPLIT ROCK

These very curious African succulents are real mimicry plants so closely resembling the stones among which they grow as to be very difficult to find except in flower. Pleiospilos Nelli in a sunny window, watering lightly when dry. Sandy soil. 1½"-2", 50c.

1"-1¼" flowering..... **35c**

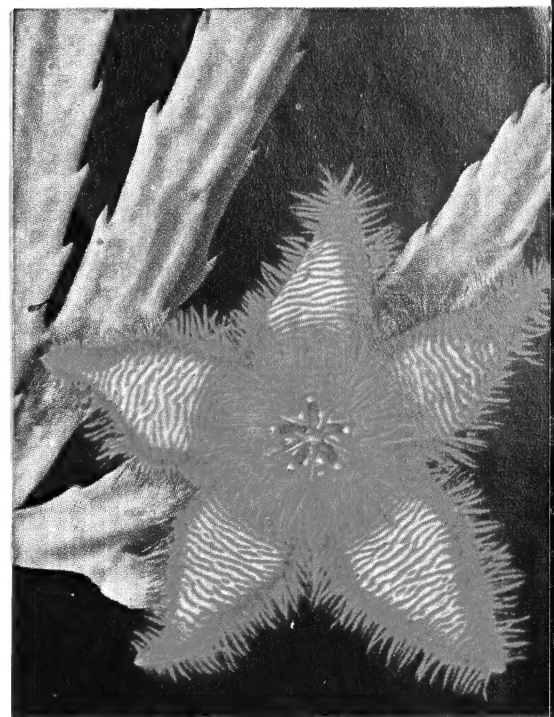

LITHOPS BELLA

The Stone faces are amongst the most strange and curious of all plants for they imitate the pebbles among which they grow both in shape and coloration. They are also true "window plants." Some are red, others dove, green, tan, etc. Sunny window. Nice..... **30c**

LITHOPS

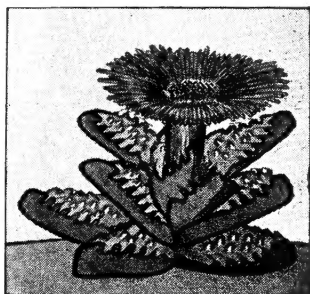

You can grow a dozen kinds in a 6-inch pan! Use a quite sandy soil. They start to grow in September.
